Explain:

## Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Union Telephone Company's compliant handset models are publicly identified for consumers and audiologists. Compliant models are listed on the company's web site, and its retail salespeople are trained to assist with complaint digital wireless phones. Written materials, pamphlets and other promotional literature are provided at the point of sale and on the website, addressing the needs of individuals with hearing disabilities. Consumers are given a 30-day trial period within which to try out digital wireless phones to determine whether they will work properly with their hearing aids.

## Methodology for Functionality Levels

- Basic: These phones are primarily designed for users that just use the phone for voice calls and text messages. They may not have email, Bluetooth, music players, picture messaging (MMS) or mobile web (WAP). These phones will usually be offered at a low price
- Standard: These phones are moderately priced and offer some additional features over the basic phones. Standard phones will often be offered in varied colors and will always offer MMS and WAP functionality. These phones will usually have a camera and tend to be more durable and offer better RF performance than would a Basic phone. Most Standard phones will offer Bluetooth and music players, but not always
- Fashion: These phones vary greatly in price and are designed with a fashion conscious consumer in mind. These phones will have a unique style and often be offered in varied colors. All Fashion phones will offer MMS and WAP functionality. Most fashion phones have Bluetooth and offer basic email synchronization from a POP3 account using the WAP connectivity
- Utility: These phones vary from a moderate to high price and are designed to have the type of features that business consumers desire. All utility phones will offer Bluetooth, Good RF Performance and MMS / WAP functionality. Utility phones are normally one of the staple products offered to most consumers since they have a better than average life in use.
- Entertainment: These phones vary from a moderate to high price and are designed to offer a large number of entertainment functions in a single device. Entertainment phones will always offer Bluetooth and a media player. Most Entertainment phones will offer expandable memory or a larger memory for storing music, pictures and video. Varied colors are often offered with this type of phone. A software package and USB cable will often be provided to allow synchronization to a computer for music or other data
- Enterprise: These devices are usually the higher priced phones with the highest amount of functionality. These devices typically have the ability to sync with POP3 email services and often offer synchronization with exchange or other corporate style email and calendar services. These products will offer some type of media player although its primary function is to provide the connectivity and messaging features a user will need for personal and business use.
